

meet our energy industry needs

Energy is a growing field.

Alternative energy sources will create an even stronger demand for the types of employees also needed in legacy energy industries.

Technicians, electricians, welders, engineers, lineworkers and chemists will be needed. So will installers, analysts, information systems specialists and environmentalists.

The need is here today.

The Energy Industry Partnership is ready to help you meet the challenge.

Get connected with a Career in Energy.

Powerful Ideas at Work

energy careers in northeastern PA

The Energy Industry is facing a crisis.

The workforce is retiring, but the demand for energy keeps increasing. New sources of energy such as solar, wind and water as well as new directions in electric, nuclear and coal have created a need for employees like never before.

All types of jobs are available right here in Northeastern Pennsylvania

Technicians, welders, chemists, electricians, engineers, information systems specialists, installers, lineworkers and environmentalists – just to name a few.

These are high paying positions that cannot be outsourced! If you're interested in a challenging and interesting career,

Energy is for you.

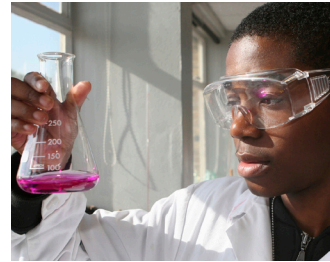

Promoting Energy Literacy in NEPA

The Energy Industry Partnership has collaborated with industry leaders and educators.

Outreach events are being held at elementary, middle and high schools to show how energy impacts our lives every day.

Hands-on presentations showcase the careers available in the industry and the skills needed to pursue them.

The earlier students hear about the many opportunities in the Energy Industry, the better prepared they are to choose the educational training that will help them become part of the future.

Powerful Ideas at Work

science, technology, engineering & math

In the Energy Industry, you'll use science and math every day.

Whether you're a technician in a nuclear plant, a welder building wind mills, or an installer putting up solar panels, your skills will be built on science and math.

Perhaps you'll discover a way to turn plants into energy as a chemist.

Or perhaps you'll design and build a solar car that will revolutionize the auto industry!

Can you see yourself managing systems at an electric plant or finding a way to reuse energy as an environmentalist?

Anything is possible in the Energy Industry.

Get started today!

Is there a Science or Energy Club at your school? Does your school hold Science Fairs? The **Energy Industry Partnership** can work with your school to start one.
